As a person who has been diagnosed with asbestosis I found the recent letter I received from my attorney very troubling. I have worked in steel mills for over thirty years. My father work in the steel mill for thirty eight years. During our employment we were exposed to numerous products containing asbestos with no warning of the danger involved. I find it hard to believe that the court is considering denying my right to seek relief from the companies that knowingly sold dangerous products with total disregard for people's health. I hope when considering the proposed court rule you keep in mind that we are real people with real health problems. All I want is my day in court.
